

Back to Basics

Always start with a full check of your SCBA, the bottle should be full, mask has a good seal and the PASS alarm activates correctly

Truck Checks

Finish your truck check with wash, take pride in your apparatus and show it the respect it deserves

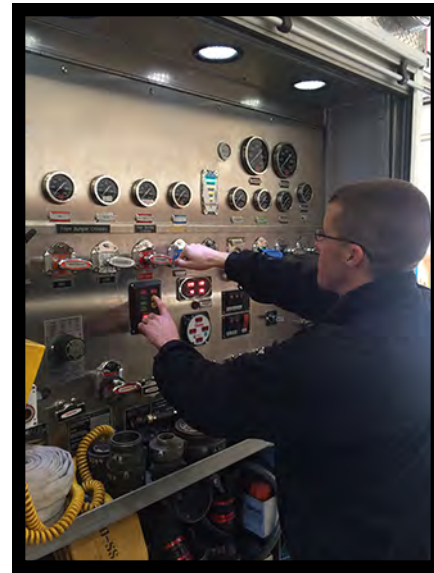

Always check your nozzles and hose loads, it's your line own it

Start your saws, check the fuel and oil levels and ensure they "make the cut"

Take the time to hone your hand tools, make sure the edges are correct and tools are free of rust and spurs

Perform a pump check:
Get a Prime
Exercise Valves
Pressure/Volume
Review Pump Pressures
