

Back to Basics

The Set-Up

First Due

Irons & Nozzle

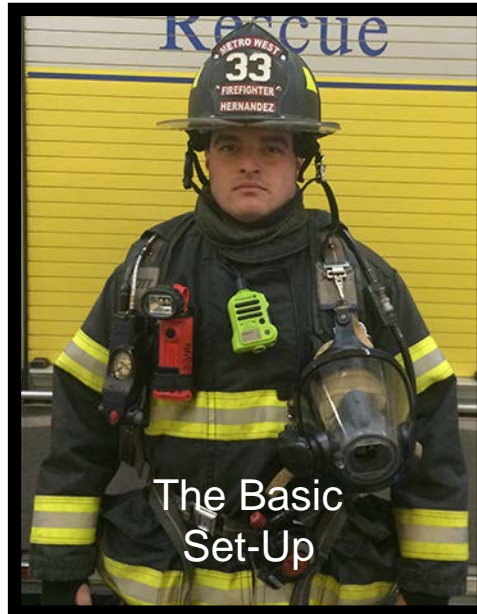

While the nozzle is a tool, the irons facilitate the forcible entry and can be left at the door for later use if needed

Check the Building

Water Can, Hook & Halligan

This provides forcible entry options, opening up walls for investigation as well as fire control and extinguishment

The Basic Set-Up

SCBA, Flashlight, Radio

Every firefighter should come off the truck with full PPE, SCBA, radio and flashlight

Second Due

Search Rope, Hook & Halligan

This provides options for either an aggressive interior search or provide for outside vent

Automatic Alarm

High Rise & Irons

Always expect fire, this provides forcible entry and standpipe connection
